Courses & Teaching

EUR – Institute of Social Studies, The Hague, The Netherlands

Regression and Data Analysis (Graduate)

Taught in the academic years 2018/19, 2016/17, 2015/16, 2014/15, 2013/14, 2012/13

The course introduces students to the basic principles of classical regression analysis and discusses modern techniques of data analysis both as supplements to standard regression analysis and as stand-alone diagnostic tools. Hands on computer workshops are designed to familiarize students with the statistical package STATA.

Collecting and Evaluating Data (Graduate)

Taught in the academic years 2020/21, 2019/20, 2017/18

This course responds to the increasing demand for primary (micro-)data collection. Typically, courses on statistics and econometrics focus on estimation and model specification. This course is designed to deal with such blind spots and addresses the following issues: Survey design and sampling strategies, sample size, power calculations and minimum detectable effects, the use of sample weights, dealing with non-response and measurement error.

Principles of Economic Development – Microeconomics (Graduate)

Taught in the academic years 2020/21, 2018/19, 2017/18, 2016/17, 2015/16, 2014/15, 2013/14

This course is aimed at giving students a thorough knowledge of the key theoretical and policy debates in development macro- and micro-economics. The microeconomics part deals with the economic analysis of households, firms and institutions.

Health and Economic Development: Policies and evaluation (Graduate)

Taught in the academic year 2017/18

The course is designed to deal with two broad issues (i) the linkages between health and economic development, in particular, in the context of developing countries and (ii) an examination of the rationale for public provision of health care. The course discusses factors driving resource allocation and the effectiveness of public health spending including issues such as absenteeism of health workers, and corruption in the health sector.
